The program proposed by the applicants will allow a passenger using either or both a technology network company’s (“TNC”) application and other third-party service provider software and hardware systems to connect to a taxicab driven by a Taxicab Authority permitted driver with all operational and insurance obligations mandated by NRS Chapter 706 required for those services. At the Public Hearing the Nevada Taxicab Authority Board will receive reports on and data generated by the pilot program and may consider whether, and under what terms and conditions, passenger use of the TNC technology application should receive final authorization. Applicants state their proposed pilot programs are intended to determine if this arrangement benefits passengers and drivers without jeopardizing a passenger’s safety, and to provide data about the comparability between a meter rate and up-front pricing supplied through the TNC application. They seek to use technology provided by Curb Mobility, LLC, the Kaptyn DT5 In-Vehicle Mobile Data Terminal or technology identified as the Ztrip/Taxicab Authority or other taxi carriers such as Deluxe system to conduct the pilot program. In accordance with action taken on October 15, 2025, by the Nevada Taxicab Authority Board, the pilot programs were approved for 184 days to end April 17, 2026. This pilot program is examining the use by passengers of a transportation network company (“TNC”) technology application to connect to a taxicab driven by a Taxicab Authority permitted driver with all operational and insurance obligations mandated by NRS Chapter 706 required for those services. At the Public Hearing the Nevada Taxicab Authority Board will receive reports on and data generated by the pilot program and may consider whether, and under what terms and conditions, passenger use of the TNC technology application should receive final authorization.
